

Commercial Vehicle Incident Investigation Course (CVIIC)

March 24th & 25th, 2012
Southland Transportation
13503-149 St
Edmonton, Alberta
(8am to 5pm)

This one-of-a-kind two-day (16-hour) collision investigation course has been developed specifically for the private sector. When a company or organization is involved in a motor vehicle incident it is imperative that the on-scene evidence is gathered in order to determine the sequence of events and to assist in determining why the event occurred. Knowing the WHY is critical for businesses to determine the root cause(s) of incidents and what needs to be done to prevent incidents in the future.

Who should attend?

- √ Fleet Owners / Operators
- √ Managers / Supervisors
- √ Occupational Health & Safety Professionals
- √ Emergency Response Personnel
- √ Owners / operators / users of PRD Roads
- √ Users of Forest Service Roads
- √ Insurance Agents / Claims Adjusters

Why attend?

Learn the skills to better manage your corporate liability while operating on resource roads. Law enforcement agencies are restricting what incidents they will attend, often referring persons involved to attend their insurance companies. The on-scene physical evidence at a crash is critical in order to determine WHAT took place. Business / organizations need to have the skills to collect, interpret, and analyze the evidence.

Topics Include:

- | | |
|--|--|
| <ul style="list-style-type: none"> ➤ Collision investigation protocol ➤ Response levels ➤ Police involvement; know your rights to access information ➤ Criminal vs. Civil ➤ Pre-Scene & Pre-Trip analysis | <ul style="list-style-type: none"> ➤ Scene attendance (identification & interpretation of physical evidence; collection; field sketch; documentation) ➤ Analysis e.g. determining contributing factors; root cause; statements ➤ Practical e.g. preparing field sketch; speed calculations ➤ Evaluating root cause; preventability |
|--|--|

The **Commercial Vehicle Incident Investigation Course (CVIIC)** will be delivered by a highly-qualified instructor: Associate **Chris Gauvin**, with over 13 years as a Technical Collision Investigator; nine years as a Collision Reconstructionist, and currently an active member of the Calgary Police Service. This dynamic course involves a number of case studies and practical exercises that are applicable to industry. Each student receives a binder of handout material, Blue Blitz Traffic Template, clip board, a driver / operator portable investigation kit, and certificate upon completion (written exam). 1.0 Certification Maintenance Points from BCRSP.
